-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 06 November 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3629

1. Applicant should note the changes to patent practice and procedure:
  - A) effective December 01, 1997 as published in the Federal Register, Vol 62, No. 197, Friday October 10, 1997;
  - B) effective November 07, 2000 as published in the Federal Register, Vol 65, No. 54603, September 08, 2000; and
  - C) Amendment in revised format, Vol. 1267 of the Official Gazette published February 25, 2003.
2. The disclosure is objected to because of the following informalities:
  - A) applicant must update:
    - (1) the continuing data on page 1;  
with the current status of each of the referenced applications, e.g., --now abandoned--, or --now patent #?--, or --which is abandoned and now serial number #?--, etc.
    - B) The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01. See applicant's use of web address in:
      - (1) the paragraph at page 7, lines 15-18, "By selective use of the URL ... is: <http://merchant.com.widget>."; and
      - (2) the paragraph at page 7, lines 19-22, "When the merchant is selling ... is: <http://merchant.com.widget/blue>."Hence, applicant should delete the http:// from page 7, lines 18 & 22.  
Appropriate correction is required.
3. The specification and drawings have not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification or drawings. Applicant should note the requirements of 37 CFR § 1.74, § 1.75, § 1.84(o,p(5)), § 1.121(a)-1.121(f) & § 1.121(h)-1.121(i).

4. Claims 1-11 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4.1 In regard to claims 1, 5 & 9, although the disclosure supports the operation of the invention that includes the remote computer connecting the customer computer to a selected site at the merchant's web site, applicant's use of the phrase "to a selected site in response to said authorization indicia" lacks support with in the disclosure for the remote customer's computer being connected to any web "site" as recited in these claims. Claims 2-4, 6-8, 10 & 11 inherent the same problem through dependency.

4.2 For the above reason, applicant has failed to particularly point out what is regarded as the invention.

5. Claims 1-14 are provisionally rejected under the judicially created doctrine of double patenting over:

A) claims 1-13 of copending Application No. 09/654,339.

This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

5.1. The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows:

A) a computer network;

B) a merchant computer, which perform the same functions in either the patents or applications; and

C) a financial/settlement/payment computer, which perform the same functions in either the patents or applications.

5.2 The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29

Art Unit: 3629

USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5.3 A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

5.4 Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. The following is an Examiner's Statement of Reasons for Allowance over the prior art:

A) the prior art, for example, either Payne et al (5,715,314 or 5,909,492) disclose a payment/settlement system in which an user at a consumer computer communicates via a computer network with a merchant computer. When the user wishes to purchase an item, the consumer computer communicates payment information for user's order to a remotely located payment processing center via the network. The payment processing center then requests an authorization indicia from a financial processing computer. Once the payment processing computer receives the authorization indicia, the payment processing computer sends an indication of the authorization to the merchant. Once the indication of the authorization has been received by the merchant, the merchant releases the ordered items to the customer based on the procedure established by the terms of the transaction.

B) however in regard to claims 1, 5, 9 & 12, the prior art does not teach or suggest that the remote authorization computer would connect the customer computer to a selected site in the merchant computer in response to the authorization indicia. Claims 2-4, 6-8, 10, 11, 13 & 14 are allowable for the same reason.

7. Response to applicant's arguments.

Art Unit: 3629

7.1 All rejections and objections of the previous Office action not repeated or modified and repeated here in have been over come by applicant's last response.

7.2 As per the objection to the disclosure, since:

A) applicant failed to explicitly request that the substitute pages filed July 10, 2003 replace the originally filed pages, the requested corrections have not been made. Hence, applicant's argument's are non persuasive. It is noted that the proposed corrections filed July 10, 2002 would overcome the objections to the disclosure, if they are resubmitted as a new amendment.

7.3 As per the provisional double patenting rejection, since in response to this rejection must do one of the following:

A) cancel the conflicting claims; or

B) must amend the conflicting claims so that the conflicting claims do not have the same claimed subject matter; or

C) file a terminal disclaimer (provisional double patenting only); or

D) abandon the application so that the conflicting claims are no longer pending.

Hence, whenever a double patenting rejection is made whether the it is a statutory or provisional double patenting, then applicant is required to appropriately address this rejection in applicant's next response. Since applicant failed to appropriately address the provisional double patenting rejection, applicant's argument's are non persuasive.

7.3.1 Further although applicant's response indicates that two terminal disclaimers were filed, only one disclaimer has been found in the instant file.

8. The shorten statutory period of response is set to expire 3 (three) months from the mailing date of this Office action.
